PROFESSIONAL SUMMARY

Computer Science graduate with hands-on software engineering experience developing, testing, debugging, and maintaining web applications using React.js, Node.js, Express.js, MongoDB, Python, and SQL. Experienced in translating functional requirements into application features, performing functional testing, troubleshooting software issues, working with databases and REST APIs, and maintaining technical documentation. Strong foundation in full-stack development, data validation, Git-based development, and cross-functional collaboration.

EDUCATION

Jain College of Engineering and Research

Bachelor of Engineering (B.E.) in Computer Science and Engineering

Belagavi, Karnataka

Dec. 2022 – May 2026

EXPERIENCE

Full Stack Development Intern

SS Inphinite LLP

Sept. 2025 – May 2026

Bengaluru, Karnataka

- Developed and maintained a MERN-stack School ERP application with student management, attendance, leave management, and administrative dashboard modules using React.js, Node.js, Express.js, and MongoDB.
- Translated functional requirements into reusable application features and responsive user interfaces while collaborating with development and design team members.
- Performed functional testing, debugging, and troubleshooting across frontend, backend, REST API, and database layers to identify and resolve application issues.
- Built an invoice generation and management application, implementing structured data handling and application workflows using the MERN stack.
- Worked with MongoDB data operations and API responses to validate application data and maintain consistency across frontend and backend components.
- Used Git and GitHub for version control, collaborative development, code management, and maintaining application changes.

Python Application Development Intern

Dlithe Consultancy Services Pvt. Ltd.

June 2024 – Sept. 2024

Belagavi, Karnataka

- Developed Python-based applications by converting functional requirements into working software features.
- Performed application testing, debugging, and defect resolution to improve software reliability and functionality.
- Participated in code reviews and maintained technical documentation for application functionality and development activities.
- Worked collaboratively during development and deployment activities while following software development best practices.

PROJECTS

Sentinel AI – CCTV Face Recognition System | *React.js, Node.js, Express.js, MongoDB, Python, OpenCV, REST APIs, C*

- Developed a full-stack surveillance application for real-time face detection, recognition, user management, and security monitoring.
- Integrated a Node.js/Express backend with Python, OpenCV, and dlib-based recognition services and MongoDB for persistent application data.
- Implemented detection logs and alert workflows while debugging integration issues across frontend, backend, database, and Python services.
- Designed administrative functionality for managing users, registered faces, surveillance data, and application settings.

SpokenHands – Sign Language Recognition | *JavaScript, Node.js, Express.js, Python, HTML, CSS, Git*

- Developed an Indian Sign Language recognition application that converts recognized gestures into English, Hindi, Kannada, and Marathi.
- Built backend services using Node.js and Express.js and integrated Python-based gesture recognition with the web application.

- Tested and debugged interactions between recognition, backend, and user interface components to support reliable application behavior.

Gesture-Controlled Presentation System | *Python, OpenCV, MediaPipe, Computer Vision, Raspberry Pi*

- Developed a real-time gesture-controlled presentation system using Python, OpenCV, MediaPipe, Raspberry Pi, and Pi Camera.
- Implemented and tested gesture-based controls for hands-free slide navigation and multimedia interaction.
- Debugged real-time video processing and gesture recognition workflows to improve system reliability and usability.

TECHNICAL SKILLS

Programming Languages: Python, C, C++, JavaScript, SQL

Web Technologies: React.js, Node.js, Express.js, HTML5, CSS3, REST APIs

Databases & Data: MongoDB, MongoDB Atlas, MySQL, SQL, Data Validation

Software Engineering: Functional Testing, Regression Testing, Debugging, Troubleshooting, Code Reviews, Technical Documentation, Version Control

Developer Tools: Git, GitHub, VS Code, PyCharm, Postman

Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS

PUBLICATIONS

Smart Vision for Silent Voices: A Review of Sign Language Recognition Technologies

Sept. 2025
